2005 NORD Annual Conference

*With the National Institutes of Health
(NIH) Office of Rare Diseases*

This year the NORD Annual Conference focuses on healthcare reimbursement issues, providing you with resources to navigate your health insurance or help others to access Medicaid, the Children's Health Insurance Program (CHIP), or the new Medicare Prescription Drug Benefit.

NORD brings to the rare disease community a unique opportunity to explore resources, learn from experts, and network with other individuals who understand the needs and concerns of this involved audience. General sessions and workshops address issues of interest to individuals, family members, professionals, and leaders of voluntary health agencies and support groups. In a cooperative effort with the Office of Rare Diseases at the National Institutes of Health (NIH), the NORD Annual Conference offers a two-track format that provides workshops for patients and families, as well as for national voluntary health agency and support group leaders. Join NORD for this informative and dynamic conference.
